

**REF: KPPL/ CERA/36**

SUB: TECHNICAL SPECIFICATION OF PLASCON CERA

PLASCON CERA

Density	0.97 gm/cc
Average molecular weight	Above 6 million
Co efficient of friction	0.08
Hardness Shore D	71
Tensile Strength at yield	36 N/mm <sup>2</sup>
Yield Stress	>17
Nominal Elongation at break	>50
Abrasion loss by sand slurry method	80

Due to above excellent properties, our PLASCON Cera materials are working satisfactorily in various reputed Paper Mills of India and abroad.

We, therefore, request you to please expedite your valued order per return mail. We assure you that you will also be satisfied with the qualitative working performance and durability of our above product.

Thanking you,

For KBK Plascon Pvt Ltd
